

Project Activity 5.3.2: Organise and implement simulation exercises to test implementation/suitability of contingency plans and operational manuals

Training 1

Sim ex No. 1 - Foot and Mouth Disease (FMD) in small ruminants

Date: 23-24 March 2023
 Venue: Nicosia
 Target group: central veterinary 'service' - veterinary 'department'

General objective:	Via simulation of FMD in small ruminants, to elaborate the new concept of the documentation for contingency preparedness, in particular the Contingency Plan (CP) and Operational Manual (OM) for FMD, SOP for notification, SOP for biosecurity when entering the farm, SOP for epi-investigation, SOP for sampling and SOP for killing of animals in event of FMD. Upgrade the skills for conducting of briefing and practical implementation of the developed SOPs.
Specific objectives:	Overview of the contingency documentation and practical exercise for strengthening the preparedness on the following elements: - Notification - Biosecurity - Epi investigation - Sampling - Killing of animals - Measures on the suspect holdings - Conducting briefings and informing the public

Speakers: Mustafa Tufan, Key Expert (KE3)
 Blagojcho Tabakovski, Senior Non-key Expert (SNKE)
